

TLX GOLD
UK Wind Pressure Zone Suitability

Batten Gauge	Declared Wind Uplift resistance (Pa)	Zone Suitability	Map Zones
≤ 345 mm	3335	Zones 1 - 5	
≤ 250 mm	>3335	Zones 1 - 5	
≤ 100 mm	>3335	Zones 1 - 5	

Note 1: These figures apply to batten restrained laps

Note 2: Zone suitability applies only for underlays in applications where a well-sealed ceiling is present, ridge height is not greater than 15m, roof pitch is between 12.5° and 75°, site altitude is not greater than 100m, and no significant site topography is present. Other applications might require underlays with greater wind uplift resistance and it is advisable to seek professional advice.
